

# Streamline Communication with Callbridge Complete

Experience frictionless switching between several digital tools.

Optimize collaboration and video connections with Callbridge's professional suite of tools to bring your team together from anywhere in the world.

## Online Meetings

Offer your customers a video meeting solution with collaboration tools like screen sharing, whiteboard, meeting recording and more.

## Enterprise Team Messaging

Stay in touch with your team and departments using a channel mode of communication that ties in multiple ways to communicate in one centralized location.

## Rooms and Workspaces

SIP Meeting connections mean software-based video conferencing for every room in your office. Easily connect Cisco, Lifesize, and Polycom devices. No setup technician needed.

## Audio Conferencing

Crisp, clear, and high-quality audio allows for professional-sounding transmission every time, even in low-bandwidth conditions.

## Callbridge Add-Ons

### Webinars and Events

Showcase your product or service with live or recorded, high-quality webinars that educate and convert.

### Embedded Video

Embed video into websites and apps using our plug-and-play video conferencing API so users can video chat without ever leaving your page.

### Developer Platform

Next-generation, plug-and-play API and SDK solutions to enhance the online meeting experience.

# Why Callbridge?

## Meet From Anywhere

Reach and connect to anyone from anywhere with Callbridge's absolute availability – iOS and Android included.

## Reliable Security

Guaranteed privacy and security, plus HIPAA and GDPR compliance. Relying only on local developers and routing via secure locations, Callbridge Complete also uses WebRTC technology.

## All in One

Several popular digital tools are all conveniently packaged together for a completely collaborative and optimized video experience.

## Fits With Existing Tools

Let iotum's APIs seamlessly integrate with how you're already using your digital tools and workflows to support or build new ones without interrupting the flow.

## Everything All in One

Multiple digital tools you know and need, conveniently packaged together to scale and use how you want.

## Enables Remote Working

Provide an online meeting room with all the bells and whistles plus additional modes of communication via web browser and Android or iOS mobile app.

## Grows Network

Expand your network and grow your reach to accommodate more participants alongside technology that scales with you.

## Live Stream and Record

Straight from your online meeting room or Teams Messaging app, you can live stream to YouTube and create public or private events online.

## Customized Branding

Your logo, branding watermark, and color palette take up prime visual real estate across all user touchpoints, totally customized.

## Stay Connected

Keep employees and clients in the know using virtual settings and real-time communication including SMS notifications and Text Chat.

## Easy and Reliable Access

Fast and easy access for both remote and office workers, and geographically independent clients with high-quality audio and video connections.

## Other Integrations

Easily integrate iotum's technology into your current offering plus other integrations like Slack, Google Calendar, and Outlook.

Nearly

**80%** of workers are using collaboration tools for work in **2021**, up from just over **half** of workers in **2019**.
